EDUCATION

- 2019: B.Tech. in Electronics and Communication from Hemvati Nandan Bahuguna Garhwal University (HNBGU) Srinagar, Uttarakhand
- 2013: 12th from Shri Guru Ram Rai Public School Srinagar, Uttarakhand
- 2011: 10th from Rainbow Public School Srinagar, Uttarakhand

CORE COMPETENCIES

- User Interface Design
- Front-End Development
- Performance Optimization
- Responsive Web Design
- Agile Methodologies
- Code Quality Assurance
- Data Management Strategies
- User Experience Enhancement
- Component Reusability
- Cross-Functional Collaboration

TECHNICAL SKILLS

- React.js
- Next.js
- Redux
- Redux Toolkit
- JavaScript

Abhishek Pundir

Software Developer

PROFILE SUMMARY

- **IT professional with nearly 2 years** of exposure and learning in **Software Development**, with a concentrated emphasis on front-end engineering in the technology industry, showcasing a deep comprehension of contemporary web application frameworks and libraries.
- Working as a **Software Developer** at **Appventurez Mobitech Pvt. Ltd.**, tasked with designing user interfaces and executing front-end functionalities that adhere to design specifications and fulfill user needs.
- Successfully **leveraged advanced front-end technologies** such as **React.js**, **Next.js**, and state management libraries, while also acquiring proficiency in API integration and techniques for optimizing performance.
- **Proficient in Software Development Lifecycle (SDLC)** right from requirement analysis, documentation (functional specifications, technical design), coding & testing to maintenance of proposed applications.
- Proven track record of effectively **managing cross-functional teams & collaborating with stakeholders to achieve project objectives**.
- Clarified & validated business rules at the time of **requirement gathering**, that resulted in major improvements in **data quality and integrity**; leveraged full-stack knowledge and experience to build interactive & user-centered software designs.
- **Provided insightful knowledge of business process analysis and design**; managed application based process re-engineering, process optimization, cost control & revenue maximization.
- **Managed the maintenance of program modules** that includes operational support, problem resolution, production support, preventative and corrective maintenance and enhancements.

WORK EXPERIENCE

May'23 – Till Now | Software Developer
Appventurez Mobitech Pvt. Ltd., Noida India
Responsibilities:

- Spearheading the development of user interfaces utilizing React.js and Next.js, ensuring that design specifications from Figma are accurately translated into functional web applications that meet user needs.
- Orchestrating the implementation of front-end functionalities, including state management, API integration, and form handling, to create seamless user experiences on various platforms.
- Engaging in code reviews and maintaining high standards of code quality, while actively staying abreast of the latest advancements and best practices in React.js and Next.js.

- HTML5
- CSS3
- Context API
- Material UI
- Webpack
- SCSS
- Shadcn
- TypeScript
- Tailwind CSS
- API Integration
- Postman
- Git
- Nodejs
- Express
- MongoDB
- Jest
- GitHub
- Firebase

SOFT SKILLS

Leadership	
Visionary	
Analytical Problem Solving	
Business Ethics	

PERSONAL DETAILS

Languages	English, Hindi
Address	Sirwari Badiyargarh Tehri Garhwal Uttarakhand- 249161
DOB	4 th September 1996

- Enhancing application performance by employing advanced techniques such as lazy loading, code splitting, & memorization, which collectively contribute to more responsive applications.
- Utilizing Next.js to develop server-side rendered applications, thereby improving SEO and user experience through reduced initial load times and enhanced overall performance.

Highlights:

- Successfully implemented a comprehensive testing strategy using Jest and React, which resulted in a notable reduction of production bugs by approximately 70- 80%, thereby enhancing code reliability.

TRAINING

Aug’22 – Apr’23 | Sharpener Tech, Bengaluru India
Responsibilities:

- Engaged in an intensive training program focused on front-end development, acquiring hands-on experience in building responsive user interfaces using React.js. Developed pixel-perfect UIs based on Figma designs, emphasizing component reusability and CSS modularity to enhance the maintainability of code.
- Built robust front-end functionalities utilizing Axios for API calls, ensuring effective data retrieval and error handling to maintain application integrity.
- Integrated Formik and Yup for form handling and validation, ensuring that user inputs were processed accurately and efficiently while maintaining data integrity.

PROJECTS

Simple Keto Jan’24- Present

Technology used: Next.js, Tailwind, Shadcn
Brief:

- Created a diet planner application that delivers customized dietary recommendations based on user details such as age, weight, activity level, and health objectives.
- Applied AI-driven algorithms to analyze user data and craft meal plans aligned with specific nutritional goals.
- Developed an intuitive dashboard allowing users to track calorie consumption, discover meal options, and receive instant dietary insights.

Impatz Innovative Design Oct’24- Present

Technology used: React.js, Material UI, Redux Toolkit
Brief:

- Built an admin dashboard to simplify the management of user data, including ratings and questionnaire feedback.
- Designed features enabling users to update their information while maintaining full administrative control over data oversight.
- Integrated a real-time chatbot to assist users with queries, enhancing the overall user experience and ensuring prompt issue resolution.

Loan Jagat Mar’24 – Oct’24

Technology used: Next.js, Material UI
Brief:

- Developed responsive user interfaces using Next.js and Material UI, ensuring a seamless experience across various devices.
- Played a key role in enhancing Loan Jagat's online loan application platform by implementing secure user authentication, dynamic dashboard features, and seamless API integrations.

Auto Appeal System **Mar'24**

Jul'23 -

Technology used: React.js, Redux Toolkit

Brief:

- Developed a user-friendly dashboard to streamline appeal management across three panels: User, Super Admin, and Higher Authority, facilitating efficient oversight and operations.
- Implemented a secure login system and features for managing departments, services, and users, ensuring smooth workflow and real-time appeal tracking by higher authorities.
